COMMISSION FOR THE GEOLOGICAL MAP OF THE WORLD

The CGMW, is issued from the oldest international organisation in geosciences, the International Geological Congress (IGC), created in Paris in 1878. The idea of the Commission was postulated in 1910 in Stockholm at the 11th IGC, and officially established in 1913 at the 12th IGC in Toronto.

It is a non-profit-making scientific and educational body governed by French law with headquarters in Paris, France.

The CGMW is responsible for designing, promoting, coordinating, preparing and publishing small-scale thematic (geology, tectonics, ore deposits, natural resources, climate, etc.) Earth Science maps of continents, major regions, and oceans. In the context of its mission, the CGMW intends to play a leading role in the use and diffusion of digital cartographic techniques, as well as in the development of international standards.

THE CGMW IS AFFILIATED TO THE INTERNATIONAL UNION OF GEOLOGICAL SCIENCES (IUGS) AND TO THE INTERNATIONAL UNION OF GEODESY AND GEOPHYSICS (IUGG), AND OPERATES IN CLOSE COOPERATION WITH UNESCO
